SANITATION SYSTEMS RESOURCES

November 2019 / Vol 1

Agenda For Change

Agenda for Change members are working together to fundamentally shift how the WASH sector works to reach Sustainable Development Goal 6.1 targets by 2030. Reaching these ambitious targets necessitates a sector-wide approach that tackles all dimensions – both actors and factors – at all levels of decision-making; city or district, national, and global.

These resources are examples of how our members work to strengthen sanitation systems around the globe, ensuring permanent services for all.

AGUACONSULT & WELTHUNGERHILFE

[Strengthening the inclusion of sanitation and hygiene in WASH systems thinking](#)

A discussion paper that aims to contribute to the sector debate on how sanitation and hygiene can be better captured in WASH Systems thinking.

CRS

[Sanitation Challenges in Urban Ghana](#)

A blog that introduces CRS' work with local government officials to rehabilitate public toilets in Tamale city, Ghana.

CWSC

[The RENEWAL platform](#)

An overview of the pan-African RENEWAL platform for water and sanitation law across 5 pilot countries.

HELVETAS

[Facilitation of CLTS in Guatemala](#)

A video highlighting the successful facilitation of a CLTS methodology in Chiquimula, Guatemala.

IRC

[Replication guideline to Sustainable Sanitation and Hygiene for Eastern Indonesia (SEHATI) approach](#)

A guidebook sharing experiences and learning from the SEHATI community-led total sanitation programme in Indonesia.

[Full chain sanitation services in small and medium towns](#)

A learning brief outlining the ONEWASH Plus sanitation approach across 8 towns in Ethiopia.

[Sanitation tools: Creating demand and ensuring supply and finance for sanitation](#)

An introduction to sanitation tools used in different contexts; a **Sanitation Supply and Demand Tool** and a **Faecal Waste Flow Calculator**.

SPLASH

WASH in Schools for Everyone (Project WISE)

A 2-page brief on Project WISE implementation in government schools across Addis Ababa, Ethiopia and Kolkata, India.

WATERAID

Sanitation Workers Report

A research report on the experiences of sanitation workers across the globe.

Delivering Rural Sanitation Programs at Scale, with Equity and Sustainability

Photo credit: Water For People (2019)

A call to action for reprioritisation of rural sanitation and proposal of five principles for ensuring equity and sustainability.

Rethinking Rural Sanitation

A free, six-hour course geared towards designing rural sanitation programmes that are equitable, sustainable and scalable.

WATER FOR PEOPLE

No short cuts: reaching scale takes time and persistence

A blog focused on a sanitation marketing approach in the Musaffarpur district of Bihar, India.

Sanitation as a Business in Rwanda

A documentary highlighting the work on the Sanitation as a Business (SAAB) model in Rwanda.

Hey Evo! Want to End Bolivia's Sanitation Crisis? Here's How!

A blog on the local government initiative Construyo Mi Baño con Incentivo Muncipal ("I Build My Bathroom with a Municipal Incentive") in Villa Rivero district, Bolivia.

Sustainable Sanitation through Market-Based Mechanisms in Nicaragua

A project report sharing lessons learned from approaching sanitation challenges alongside microfinancing institutions in Nicaragua.

WATERSHED

Tackling the 'Political Will' Problem: How local leadership development has accelerated sanitation uptake in Cambodia

A presentation on the Civic Champions sanitation leadership program in Cambodia.
